Profile

I'm a frontend/smart contract developer with a strong foundation in Backend Development. From creating seamless and dynamic user interfaces to writing smart contracts using Solidity, Foundry, wagmi, ethers etc, I'm passionate about building modern decentralized applications.

Education

Primary School Leaving Certificate <i>Ceclam Nursery and Primary School</i>	2000 - 2006
Senior Secondary Certificate <i>Ceclam College</i>	2006 - 2012
ND/Computer Science <i>Moshood Abiola Polytechnic</i>	2014 - 2016
HND/Computer Science <i>Moshood Abiola Polytechnic</i>	2019 - 2021

Professional Experience

Duwitt INC <i>Frontend developer - remote (volunteer worker)</i>	2022 - 2023 Delaware, USA
- Even though I started out as a volunteer worker alongside other frontend developers, I quickly became a force to reckon with and I was made the team lead for frontend development during the second phase of the project. - Developed and implemented a secure mailing service, eliminating over 4,000 spam tickets annually and saving more than \$8,000 in support costs. - Deployed the company's different websites across diverse hosting platforms, ensuring 99.9% uptime and achieving a 18% increase in user engagement. - Implemented real-time data dashboards, increasing data visibility for sales team by 15% and leading to a 10% improvement in conversion rates.	

For the people Inc.

2024 - present

Frontend developer and Smart contract developer - remote

Texas, USA

- During my time with For The People Inc., I had the opportunity to broaden my skill set, delving deep into web3 technologies and Solidity development. One of my proudest achievements was resolving a complex blocker that even the lead smart contract developer was grappling with. This contribution not only advanced the project but also earned me significant recognition and a substantial bonus.
- Designed and developed a web3 application with a robust smart contract written in Solidity, enabling seamless blockchain functionality. Leveraged Ether.js, Thirdweb, and Wagmi for efficient frontend integration with blockchain networks, while creating intuitive and responsive user interfaces using Next.js and Chakra UI for an exceptional user experience.
- Established comprehensive testing frameworks using Hardhat and Foundry, achieving 95%+ test coverage. Automated deployment pipelines across multiple networks using scripts and implemented fail-safe mechanisms for contract upgrades.

Pixsee

2025

Frontend/Backend developer

Los Angeles, USA

- Developed a modern web3 application.
- Integrated with Ether.js, Wagmi for seamless blockchain UX, privy for authentication.
- Achieved 95%+ test coverage using Foundry.
- Resolved complex blockers, earning recognition and bonus.

Convexity

02/2025

Frontend developer

- Collaborate with backend developers, and smart contract developers to develop decentralized applications (dApps), DeFi platforms, and Web3 solutions.
- Work closely with UI/UX designers to translate wireframes and prototypes into responsive, pixel-perfect interfaces.
- Participate in cross-functional sprint planning, code reviews, and architecture discussions to ensure seamless integration across the full technology stack.

Skills

Solidity, Foundry, Hardhat, Typescript, JavaScript, React.js, Next.js, Vue, Nuxt, Node.js, Express.js. - React three fiber, Tailwindcss, Chakra UI, Git, MongoDB, Figma.

Certificates

- The complete 2021 Web Development Bootcamp - Udemy (02/2021)
- Checklearn's certificate of completion

Languages

English – Native / full working proficiency • **Yoruba** – Native / full working proficiency
